

CamLine live—Implementing CAPA for Production Quality

camLine continues its webinar series with camLine *live* sessions.

The next episode of camLine's "*Digital Continuity Across Manufacturing*" series, **"Implementing CAPA for Production Quality"** is coming on

- **Tuesday, December 13, 2022, 9:00 AM PST**
recommended for attendees located in Europe/North America
- **Thursday, December 15, 2022, 9:00 AM CET**
recommended for attendees located in Asia/Europe

If you are interested, register [here](#) and mark your calendars!

You will learn how to:

- Integrate CAPA into your QA systems
- Design and implement CAPA workflows
- Track all CAPA states
- Standardize and manage specifications
- Use statistical methods to set up rules and detect quality issues

- Complete CAPA with real-time reporting
- Perform effective root cause analysis

Who should participate?

- Quality Managers
- Process Engineers
- Equipment Engineers
- Production Engineers

Did you miss camLine's last webinar?

If yes, do not worry. You can now watch it, wherever you are and whenever you want!

You can watch them here on demand.
