

56. Jahrestreffen Deutscher Katalytiker

The German Catalysis Meeting is going into the next round - join us in Weimar for the 56nd edition of the "Jahrestreffen Deutscher Katalytiker" from 15-17 March 2023!

This conference has established itself as one of the most important European catalysis events, covering all aspects from research on the fundamentals of catalysis, the understanding of catalytic processes, catalyst design to reaction engineering and industrial applications. More than 400 experts from universities, research institutes and industry meet annually to present their research, exchange their ideas and share new developments and the latest results in all areas of catalysis.

Beginn:

Mittwoch, 15. März 2023, 13:00 Uhr

Ende:

Freitag, 17. März 2023, 13:00 Uhr

Veranstaltungsort:

Weimar

Deutschland
