

EURADH / WCARP 2023

Adhesion connects us again in 2023!

The **14th European Adhesion Conference (EURADH)** will be held together with the **7th World Congress on Adhesion and Related Phenomena (WCARP)** in Garmisch-Partenkirchen/ Germany.

The **Scientific Committee** consists of representatives from the EURADH countries Germany, France, United Kingdom, Spain, Portugal and The Netherlands as well as from the WCARP countries Korea, China, Japan, United States and Brazil together with guests from Israel and Italy. This composition will guarantee a real international event and covers all aspects of adhesion, adhesive bonding as well as all the other topics related to this core of the conference.

We invite scientists and engineers to take advantage of this great opportunity for exchange and to propose talks and posters with the latest findings of their work. In addition to the topic of adhesion, this year's focus is on sustainability, durability and industrial applications, among all other aspects of adhesive bonding and adhesion. Please find the complete list of topics [here](#).

For young researchers working in adhesion science in Europe the **ADHESION INNOVATION AWARD 2023** sponsored by the European Adhesives Manufacturers Association (FEICA) will be one of the conferences highlights.

Take the opportunity to meet your scientific colleagues and friends in an informal atmosphere and exchange ideas intensively!

The wonderful landscape of the Alpine foothills and the social programme we have planned provide the appropriate networking framework for this.

See you in September 2023 in Garmisch-Partenkirchen!

Andreas Hartwig & Elisabeth Stammen

Conference Chair and Co-Chair

Beginn:

Sonntag, 10. September 2023, 17:00 Uhr

Ende:

Mittwoch, 13. September 2023, 18:00 Uhr

Veranstaltungsort:

82467 Garmisch-Partenkirchen
Deutschland
