

# EdaBarCamp - Number 5 is alive!

We are happy to invite you to 'edaBarCamp -- Number 5 is alive', which will take place

- on **18th./19th. Februar 2020**
- at [IBM Deutschland Research & Development](#),  
Schönaicher Str. 220 in 71032 Böblingen, Germany (Google Maps POI).

+++ registration open +++

Our suggested (but non-exclusive) **list of topics** focuses on:

- **Continuous HW/SW Engineering** -- 'From the Model to the Chip'
- **AI for EDA, EDA for AI** -- 'Boost Design - Boost Learning'
- **Open Hardware** -- 'OpenPOWER, OpenCores, RISC-V'
- ... and many more in microelectronics and EDA.

To present and **discuss ideas and results of the ongoing scientific work**, we invite researchers from the areas of **electronic design automation (EDA)**, **microelectronics** and **(embedded) systems design** to our open barCamp event.

**Relaxing the formal event structures, the final agenda will be decided interactively by all participants on site.**

In the beginning we all propose our session-ideas with a two-to-three minutes session pitch. Based upon that **we decide together which sessions take place**. During the sessions **we interactively explain, discuss and jointly develop the topics**, which include all around **technologies, designs, software and methodologies for the design and verification** of (micro-)electronic and embedded systems. **Meeting and discussing on a par with each other** everyone's individual interests and work can and will benefit from the others:

The edaBarCamp offers this open space to you!

**Beginn:**

Dienstag, 18. Februar 2020, 09:30 Uhr

**Ende:**

Mittwoch, 19. Februar 2020, 15:30 Uhr

**Veranstaltungsort:**

Schönaicher Straße  
71032 Böblingen  
Deutschland

**Website & Anmeldung:**
