

8th E-Mobility Power System Integration Symposium

8th E-Mobility Power System Integration Symposium – 07-08 October 2024 – Helsinki, Finland

Join the [8th E-Mobility Power System Integration Symposium](#), where we delve into the pivotal challenges posed by the rising power demand from electric vehicle charging. Discover innovative solutions as we explore the seamless coordination between this heightened demand and renewable power production within the electrical system.

This symposium goes beyond the surface, emphasizing the crucial integration of electric vehicle charging infrastructure with the expansion of distribution and transmission systems. It serves as a critical platform to address the profound impact of electromobility on future power system design and operation.

Engage with a diverse array of experts, including those specializing in electric vehicles, charging infrastructure, power system operators, stakeholders from the renewable energy sector, as well as power system regulators and academic institutions. The symposium provides an invaluable opportunity for cross-disciplinary discussions and collaboration.

Don't miss out on insights from over 30 speakers who will delve into the latest advancements in integrating large-scale electromobility into the power grid. Key focus areas include smart charging technologies, addressing distribution grid challenges, and sharing project experiences. Be part of this forward-thinking event that paves the way for a sustainable and harmonious integration of e-mobility into our power systems.

Call for Papers: abstract submission deadline is 28 April!

The papers chosen for presentation at the E-Mobility Power System Integration Symposium will be published on

the IET Digital Library and IEEE Xplore and submitted for indexing in IET Inspec, Ei Compendex and Scopus.

Online Registration starts 2 July.

Beginn:

Montag, 7. Oktober 2024, 13:00 Uhr

Ende:

Dienstag, 8. Oktober 2024, 13:00 Uhr

Veranstaltungsort:

Helsinki

Finnland
