

Certificate Course: Digital Transformation Expert

English Course 2023

Modules 1&2: 16. - 20. October

Early booking until February, 1st

Due to changes in the manufacturing industry, the demand for more flexibility and agility of companies is constantly increasing. Digital transformation enables the management of risks in complex value chains and the fulfillment of customer requirements.

As a Digital Transformation Expert, you will learn the right methods and tools to implement digital transformation in your company. This includes methods for identifying potentials through the use of digital technologies, tools for evaluating and systematically implementing digitalization measures, and knowledge of tried-and-tested solutions in practice.

The course includes lectures from industry and science as well as workshops, networking and evening events in Aachen, where you can discuss and engage with our speakers and the participants informally to gather new impulses and different experiences.
