

CONNECTING THE DOTS: Smart real-time route planning with FLS VISITOUR

12/16/2021, 11:30 AM CET

Appointment and route planning processes occupy a major part of capacities in many field service organizations. Scheduling of appointments, routes or ad hoc orders is yet often done manually. In the future, this state of affairs should no longer even be up for debate.

Instead, what if limits could be shifted? Where manual route planning reaches its efficiency limit, intelligent, software-supported route planning can introduce the future to your company today.

Experience how you can use FLS VISITOUR to make your route planning more efficient with the help of our software solution in our free webinar.

See the FLS VISITOUR scheduling and route planning software in action. In our 30-minute webinar on Dec. 16, 2021 at 11:30 a.m., you will gain initial insights into how you can connect the dots optimally in the future, too.
