

HYBRID Software GmbH | Uhlandstraße 9, Freiburg

A Smart Factory needs a Smart Digital Front End

The role of the digital printer will be transformed as it takes its place in the smart factory of the future. Join this press briefing to learn about a new DFE for labels and packaging that offers a complete solution and is designed to be part of a fully automated manufacturing system, supporting Industry 4.0 telematics and integration with digital press controllers using OPC UA and MIS systems:

- Smart job creation with HYBRID Stepz
- Management & automation with HYBRID CLOUDFLOW
- A Print Controller that connects your printer to the smart factory using OPC UA
- RIPping and screening using Harlequin Direct™
- Powerful printhead electronics and software from Meteor Inkjet and Xitron
