

Hyperstone at the Embedded World 2022

Hyperstone will be exhibiting at this years Embedded World in Nuremberg. With a focus on supporting industrial storage solutions, we look forward to discussing how our custom solutions and consulting can meet the complex demands of your storage systems unique use case. We know you're striving to design high quality products, so come and pick our brains - use our expertise and years of experience to ensure your product is designed specifically to meet the demands of your system.

Furthermore, our new S9 controller for SD and microSD memory cards will also be making its exhibition debut. Like our companies focus, this controller is suitable for demanding applications. The hyMap® Flash Translation Layer enables minimal write amplification with maximum endurance and the security version of the controller also offers various security functions to enable memory cards using this controller to be used in security-sensitive applications.

Come and visit us at Hall 1 | Booth 534
