

Online Event: Detector Talks 2024 – Infrared Filters and Emitters

The Topics at a Glance

- Presentation of pyroelectric detectors and their areas of application
- Influencing spectral detector properties with infrared filters
- Selection criteria of bandpass filters for NDIR gas analysis
- The interaction between infrared filter and detector design
- How the filter gets into the detector: Mounting options and boundary conditions
- Customized infrared filters: Possibilities and limitations

Lectures from Practice

- „Thermal IR Emitters for Gas Detection and IR Spectroscopy“ / Dr. Marco Schossig, Infrasolid
- „Optical Filters for IR Detectors“ / Stefan Andersson, Spectrogon AB

Take advantage of the opportunity to expand or refresh your knowledge in a lively way and engage in direct dialogue with the application specialists and speakers.

Beginn:

Donnerstag, 18. April 2024, 13:00 Uhr

Ende:

Donnerstag, 18. April 2024, 16:00 Uhr

Veranstaltungsort:

Online
