# Protect your data – How to increase security and trust in Jira Cloud

Better together: A webinar by Jodocus (Atlassian Platinum Solution Partner) and Polymetis Apps (Atlassian Marketplace Partner)

So, you are on Jira Cloud and have just started to think about trust and security. Maybe you were on-prem before and didn't really have to care. Or maybe you started out wide-eyed and trusting, without a care in the world.

Whatever the case: Now it's 2023 and you realized that you do care about the security of your Jira instance and whom to trust with your data.

In our free live webinar, Jan Szczepanski (CMO and Co-Founder of Jodocus) and Oliver Siebenmarck (Lead Architect of Polymetis Apps) explain how to increase security and trust in Jira Cloud.

Besides pointing out the benefits of Jira Cloud and its trust and security features they will present the Atlassian Marketplace app PII Protection that adds additional security features to Jira Cloud. It helps optimizing data security and privacy by automatically checking for sensitive data and alerting admins to any findings.

Beginn:
Donnerstag, 23. Februar 2023, 16:00 Uhr
