

## JULABO@analytica2022 in Munich

After 2 years of online and video activity it's finally trade fair time again!

It is time to take the opportunity to exchange in person about the developments of the previous months. With the new MAGIO as a highlight, we will be presenting our complete portfolio of circulators for laboratories and research live for the first time at analytica. MAGIO expands the CORIO and DYNEO brand portfolio with a high-end circulator for the most demanding temperature control applications.

As one of the leading providers of professional temperature control technology, JULABO will be presenting examples of a wide range of solutions for everyday as well as custom temperature applications in laboratories and industry from June 21 to 24, 2022 in Hall B2, Stand 202 at analytica in Munich. Discover and compare CORIO, DYNEO and MAGIO at our trade fair stand and get to know one of the high-performance temperature control systems with PRESTO.

Thanks to modern technology, the new JULABO Online World takes you on a visual discovery tour of the wide range of temperature control options with units from the JULABO product portfolio.

Our temperature control experts are looking forward to having face to face discussions and your visit to our stand 202 in Hall B2 – with the best coffee specialties, freshly prepared by a barista!

If you would like to make an appointment beforehand or you need tickets for the event, then contact us by phone +49 7823 51-190 or by e-mail [info.de@julabo.com](mailto:info.de@julabo.com).

We are ready for inspiring analogue conversations!

See you soon in Munich,  
Your JULABO team
