

Managing and Regulating the Radio Spectrum: A Practical Guide

Navigating the radio spectrum is a complex task! Join our 4.5-day online course : "Managing and Regulating the Radio Spectrum: A Practical Guide," from 16th-20th October 2023.

Dive into the nuances of spectrum management, understanding the international frameworks, and how they translate into actionable policies at national and regional levels. Explore the diverse spectrum bands, historic to new radio technologies, and maximize efficiency in spectrum sharing.

Engage with emerging techniques like dynamic spectrum access and licensed shared access, and get insights into their advantages. Perfect for professionals in spectrum regulation, consultants, manufacturers, investors, and anyone involved in daily spectrum management.
