

Webinar: Production and characterization of bitumen emulsions

In this 45-minute live webinar, for the first time, **Vialab** and LUM combine their know-how and present to you the best of technology to formulate, produce, characterize and control your bitumen emulsions based on real case studies.

By jointly using **ATOMIX**[®] laboratory pilots and the **STEP**-Technology[™] of **LUMiSizer**[®], produce, control, adjust and answer the following practical questions:

Which emulsifier to use? In which quantity? For what quality of emulsion (particle size and polydispersity)? At which temperature should the emulsion be stored? For what speed of bitumen/water separation? At the end of session Antonin Richard and Sylvain Gressier will answer your questions.

It's free, online and live, on:

- April 29th at 14h00 – In English, register here : <https://bit.ly/3jt8SNJ>

Beginn:

Freitag, 29. April 2022, 14:00 Uhr

Ende:

Freitag, 29. April 2022, 15:00 Uhr

Veranstaltungsort:
