UNIVERSITÄT
TÜBINGEN

 m
Medical Innovations
Incubator GmbH

The participants can survey the life science-specific start-up topics of the 4C's and thus plan ahead. The early strategic consideration of possible complications in the 4C's creates the prerequisite for attaining the necessary maturity in the shortest possible time and for convincing investors. Corresponding barriers to shortening the time to market have been identified and structured in an individual project plan.

- ONLINE WEBINAR
- Date: 02.04.2021 - 02.07.2021 (Fridays & 2 Saturdays)
