

Data Vault 2.0 Information Delivery

OVERVIEW

This class is a 2-day intensive course. This class continues where the CDVP2 Boot Camp stops – the use of the Data Vault 2.0 model to deliver information. It discusses how to implement business logic in the Business Vault and how to derive various target models from the enterprise data warehouse, including star schemas, snowflake schemas and fully denormalized information models.

MAJOR TOPICS

- Common Requirements in Information Delivery
- Introduction to Data Vault 2.0 Architecture
- Business Vault Reviewed
