

Data Warehouse Automation - Build or Buy?

In this free webinar, we take a sneak peek into one of the hot topics of modern data warehousing, namely Data Warehouse Automation. We would break down the basics of DW automation & how it has brought about a cultural shift in the realm of a modern Data Warehouse & its architecture. In this regard, we will also touch upon the often asked question "Build or buy" along with sharing our experience working with several customers who have benefited immensely from automation and the key lessons we have learned as part of our overall DW automation journey.

This webinar is for anyone who loves Data!

Speaking will be [Suhita Dutta](#), Senior Consultant @Scalefree International GmbH. Suhita is a Certified Data Vault 2.0 Practitioner (CDVP2™) and Certified Data Integration Developer for SAS 9. She has more than 10 years experience in consulting and implementation of BI solutions like Data Vault 2.0 and Successfully advised international companies in the fields of banking & financial services, logistics and pharmaceutical industry.
