Immersion Day: Data Engineering

In times where data is omnipresent, we are challenged with the task of persisting, transforming, and visualizing data to unfold its potential.

In hands-on sessions, we will show you how you can set up a scalable and secure data lake solution and how to query the data lake using Amazon Athena. You will also dive deep into data transformation processes using AWS Glue and learn how to visualize results with Amazon QuickSight.

We're looking forward to discussing typical challenges and your personal projects with you and to leaving you inspired and excited to build your own data analytics processes on AWS.

Beginn:
Mittwoch, 28. September 2022, 09:00 Uhr
Ende:
Mittwoch, 28. September 2022, 16:00 Uhr
Veranstaltungsort:
Vahrenwalder Straße 156
30165 Hannover
Deutschland
