

Project Engineer (Senior) (Vollzeit | South Amboy)

We are looking for an experienced, energetic, self-motivated mechanical or civil engineer to manage planning, designing, and overseeing installation of larger wastewater treatment projects. Strong organizational skills in project planning and experience in technical clarification are a must. Expertise in MS Office and MS Project is required. The candidate must have an M.S. or B.S. in mechanical or civil engineering and 5+ years of experience as an engineer, preferably in the wastewater treatment industry. Traveling to job sites and other branch offices is a requirement.

Job Responsibilities:

- Multi-Project planning, development, budgeting, and controlling to meet contractual milestones
- Project status meetings with management
- Proficiency in contractual terms
- Project communication services with customers, contractors, planners and suppliers
- Commissioning of designs and calculations
- Controlling of all technical documentation, material, and service instructions
- Procurement and quality controlling of all orders
- Support with supervision of installation and supervision of start-up
- Support quality control and quality assurance management
- Project Reporting
- Supportive role as a mentor to junior-level engineers
- Management – team leader advancement possible

Career Level Required: Experienced (Non-Manager)

Experience Required: 5+ Years

Education Required: M.S. or B.S. Degree in Mechanical or Civil Engineering

Job Type: Employee

Job Status: Full Time

Required Travel: 20%
